- CAT C15 Accert Engine, 548 HP.
- 63,000 lbs machine operating weight.

Here is a high reputation machine that has come directly from an excellent company in the Midwest. There has been lots of documented dealer service maintenance and repairs performed over the years, whatever the machine needed, it got. It's a machine that should make an excellent secondary used unit other than buying new.

The Universal Rotor option this machine is equipped with, is recommended for thin, medium, and thick asphalt reclamation, 1" to 10" plus. It is also recommended for soil mixing and stabilization on granular, granular with rocks, and light clay applications, as well as for surface mining on coal, shale and limestone. The existing rotor teeth are in really good condition.

Please call or email to have additional information and documentation emailed to you.

We invite your own personal or 3rd party inspection of this machine anytime, located at our facility in Bellevue, Iowa. We offer fair freight rates to any end point, and excellent financing programs if needed.
