This machine came from a multi-national mining company. Well maintained and service/rebuilt on schedule, however we don't have accurate enough records to know exact hours on machine or components.

This machine has CAT TA2 pressure testing report performed, confirming all component pressures to Caterpillar specifications. The machine starts, runs, and drives. See testing reports, and Watch online video of machine operating.

We will dismantle and load out this machine for the purchasing customer, for our standard shop rate of \$109.00 per man hour. The main load truck will need to come in first, we will load machine on beam trailer, then remove the track frames and tracks at that time. The blade and ripper will also be dismantled and packaged separately. We can also help you with freight from our company's carrier contracts if needed. We will load out between Monday thru Friday, 8 am thru 4 pm. Please contact our office ahead of time to schedule this.

Machine Price: \$148,000

We invite your own personal or 3rd party inspection of this machine anytime, located at our facility in Bellevue, Iowa.
