- ***We can provide Buyer with additional bucket, stick, or attachment options upon request, and at additional cost.***
- ***Machine breakdown and load out for shipping, included free in the price of this machine. Detailed and professional plugging of all open hydraulic lines, detailed accounting of all hardware, pins, and accessories, is something we take great pride in.***

This machine is just in from its original owner, who is one of the most long standing and reputable companies in the construction industry, their Preventative maintenance program is as good as anyone in the country. All documents and records are available.

A very sound, and solid machine both mechanically and cosmetically. The Cylinders are Dry, the Linkages are Tight. We installed the New Undercarriage in house, as well as completed the new paint job. We have pre-paint pictures also available so you can see that the machine looked good before the paint, it was just getting faded.

We have called in the local Komatsu Dealer, to perform a complete pressure testing of all components and functions to Komatsu Spec, and also perform a complete detailed machine inspection. A pre-sale work order is also currently being completed, including all fluids and

filters to be freshly serviced, any visual seeps or leaks taken care of, along with several other items.

Please call or email us, to request additional information we will send you, including the Full work order, dealer inspections, the Service History, and Full Pictures. We can also get you very fair freight rates, to anywhere in the country.

We invite your own personal or 3rd party inspection of this machine anytime, located at our facility in Bellevue, Iowa.

Price: **\$358,000**
