These are the highest quality units on the market- rugged, construction-duty, can be pulled with tractors or dozers. These units work excellent for compaction, haul road maintenance, site maintenance, leveling, compacting cuts and fills, running down and sealing/packing job sites before rain events, to keep water shedding and not soaking in and delaying production. We sell hundreds of these units and they are working throughout the country.

We invite your inspection of this unit anytime, located at our facility in Bellevue, Iowa. Nationwide shipping, and economical delivery available, to all points USA, Canada, or overseas export.

Rent or Buy.
