- Tires have some marks/cracks/cuts consistent with age and hours

Here seems to be a pretty mechanically solid 980M, that came in on trade from another dealer who previously purchased at auction. The machine has clean oil samples on the engine and trans, the hours are original, and we are further detail pressure testing the machine now to Cat Spec, and will have report available for viewing. This machine previously worked in Portland cement and has chunks of cement stuck to it in places. The auction company painted over a lot of those chunks unfortunately, so therefore we would rate the cosmetic appearance fair to poor on this machine. This machine will not go through our shop besides the pressure testing portion, we would recommend the new buyer perform general cleaning and servicing to the machine as needed.

Please call or email to have additional information and documentation emailed to you.
