» jjscheckel.com/product/98-5-wide-8-5-yard-massx-bucket-fits-cat-390-or-cat-395-hb2/

Description

This is an OEM Factory Quality MassX brand bucket, to Fit Cat 390FL or Cat 395 with JC Linkage. 100's of this exact design sold and proven in severe conditions with some of the leading contractors and mining companies in the world.

Specifications

- Cat HB2 Linkage found on Cat 390FL and Cat 395 and others.
- 98" Wide.
- 8.5 Yard Heaped Capacity Rating.
- Cat Advansey Style Bucket Teeth for easy replacement at your local Cat Dealer.
- Cast Side Protectors.
- Cast Heel Protectors.
- Hardox 400 equivalent steel designed into critical wear areas. Extra Protection wear straps.
- Moisture/suction relief holes in back of bucket.
- Extra Heavy Duty Linkage supports designed into bucket.
- Estimated bucket weight 15,250 pounds.

- All Cast Wear Parts used in these buckets in stock for immediate future shipping. We suggest buying your replacement teeth at your local Cat Dealer.
- These buckets have non-adjustable style ears. We found the adjustable retainer system on the pin ears creates lots of problems such as stripped and broken bolts, where as our basic pin and end retainer system and the use of internal ear shims as needed is much more efficient and longer lasting.
- Pins Sold Separate. We have them in stock with retainers that fit our buckets specifically.

The MassX line of buckets were specifically engineered and manufactured to meet our own fleet, and our customer's fleet demands for an above-average, top-end, Factory OEM Grade bucket suitable for heavy use and mining, while still being efficiently priced due to the MassX efficient business model.

Unlike most all imported buckets or lower end domestic buckets built, these MassX buckets have been engineered strictly for high quality and long life using the very best steel grades available in the marketplace, and are contract manufactured at proven world class ISO 9001 certified factories using the most advanced tooling and welding technologies available.

All of our buckets use a wear-resistant Hardox400 or equivalent steel on the cutting edge, side leading edges, side plates, and the wear strips on the bucket bottom. 70,000 to 100,000 PSI High strength Structural grade steel is used in all other areas of the bucket. We spec a higher quality steel than normally found in other buckets the industry; we want these buckets holding up for our customers as well or better than anything on the market.

We have buckets shipping across the country every week, Standard Delivery Prices available at very good rates. We make an efficient and super easy sales process. We invite your call, visit to our facilities, or complete inspection anytime. Call sales at 563-872-4112 or email sales@jjscheckel.com.
