New, MassX 85’ Long Reach Boom Pkg, fits Cat 390 and 395 Excavators.

jjscheckel.com/for-sale/#massxbooms

Description

This is an OEM Quality, MassX Brand, Complete 85’ long reach boom package to fit Cat 390 excavators. This exact design sold and proven in severe conditions with some of the leading contractors, dealers, and mining companies in the world.

These packages specifically manufactured with Higher Strength, 690 MPA, 100,000 PSI Structural Steel on all 4 sides of boom and stick which is significantly stronger and higher quality than the industry standard of 70,000 PSI steel used by most all other manufactures. Furthermore, the high end steel we use is temperature impact rated certified at negative 40 degrees Fahrenheit which is unheard of in the Long Reach industry as other manufactures lose significant strength at lower temperatures leading to increased failure rates.

We also stock each and every replacement part, pin, bushing, seal kit, for these boom kits in Iowa for same day shipment. We have designed these specifically to be the best value when considering the quality and price that is available anywhere in the market. Read the details! **Read the details:**

Each 390/395 Boom Package includes the following. Exactly as pictured.

- 47’6” Boom, with attached stick cylinder, Weight 26,455 pounds.
- 37’8” Stick, with attached bucket linkage and bucket cylinder, Weight 12,125 pounds.
- 2 Yard Bucket, Weight 3,086 pounds.
- Bucket Linkage is Cat 349 TB style linkage, for easy bucket interchange as needed.
- 16,534 pound Counterweight attachment.
- Built with 690 MPA, 100,000 PSI structural steel on all 4 sides of boom and stick.
- Certified Steel Impact Strength Rating to negative 40 degrees.
- All pins 40 CrMo heat treated to 55 Rockwell hardness.
- All OEM Caterpillar/USA Style fittings and high pressure hydraulic hoses.
- All products painted with Dupont OEM quality polyurethane paint.
- This package is designed to re-use the machine's original boom lift cylinders as these are not included in package.
- Total package weight is 63,206 pounds.
- Please note, when comparing long reach boom packages on the market, don’t make a mistake to compare on pricing alone. Remember that most imported long reach boom packages that you see at auctions and wholesalers are made with cheap, low strength steel, and do not include the extra hydraulic cylinders and heavier counterweight and/or don’t have parts in stock and available after the sale. There is a huge difference in quality and safety in these boom kits.

- All replacement parts are in stock at our Bellevue, Iowa facility for same day shipping. Pins, bushings, seal kits, cylinders, linkages.

- The MassX line of Booms and Buckets were specifically engineered and manufactured to meet our own fleet needs, and our customer’s fleet demands for an above average, top end, Factory OEM Grade product suitable for heavy use and mining, while still being efficiently priced due to the MassX efficient business model.

- Unlike most all imported products or lower end domestic products built, these MassX units have been engineered strictly for high quality and long life using the very best steel grades available in the marketplace, and are contract manufactured at proven World class ISO 9001 certified factories using the most advanced robotic welding machines, testing, tooling and ultrasonic testing technologies available in the world.
