# MassX “Rock Eater” Boom Ripper System, fits Cat 390 & 395 Excavators

jjscheckel.com/product/new-massx-excavator-ripper-to-fit-cat-390-395-w-hb2-linkage/

## New, MassX Excavator Ripper, to fit Cat 390/395 w/ HB2 Linkage

This is an OEM Quality, MassX Brand, Excavator Ripper Attachment. To fit Cat 390 or 395 with Cat HB2 Linkage. This exact design sold and proven in severe conditions with some of the leading contractors, dealers, and mining companies in the world.

We have designed these specifically to be the best value when considering the quality and price that is available anywhere in the market. **Read the details!**

**Each Ripper Sold Exactly as pictured, with Pins included, a $5,000 value.**

- **Total Length/Height**, 82.4” Inches - top of bracket to bottom of tooth.
- **Thickness of Shank**, 5.1” main shank.
- **Length of Shank**, 64” – from bottom of adapter plate to bottom of tooth.
- **Total weight**, 4,629 pounds.
- Pins included, a $5,000 plus dollar value.
- All pins 40 CrMo heat treated to 55 Rockwell hardness.
- Built with 690 MPA, 100,000 PSI Structural Steel, Plus Hardox and wear buttons.

These rippers are specifically manufactured with Higher Strength, 690 MPA, 100,000 PSI Structural Steel for the main, with Hardox wear plates and cast shank protectors and wear buttons in critical areas. Furthermore, the high-end steel we use is temperature impact rated certified at negative 40 degrees Fahrenheit which is unheard of in the industry. Other manufactures lose significant strength at lower temperatures leading to increased failure rates.

Unlike most all imported products or lower end domestic products built, these MassX units have been engineered strictly for high quality and long life using the very best steel grades available in the marketplace, and are contract manufactured at proven world class ISO 9001 certified factories using the most advanced robotic welding machines, testing, tooling and ultrasonic testing technologies available in the world.
